

FEAR KONSTRUKTOR • OKTOPHONY • CDR

With a vast array of releases under its belt, Fear Konstruktor shows no sign of artistic exhaustion, and continues to evolve in pursuit of creative completion. From the very beginning, we have been inspired by Nikita's enthusiastic and vibrant personality as FK reminds us what the underground art spirit is really about. Therefore, we are proud to spread the sound that takes the listener back to the days when the term 'industrial music' was taken literally. Machinery's sheer vitality brings the dead mass and weight into complex activity of a truly living organism, perfectly set within its natural environment — like an octopus that coils and writhes in unrestrained paroxysms.

Pretentious captions aside, this album contemplates the interfering frequencies, oscillations, and fluctuations of accumulated power, relentlessly throbbing in continuous cycles. Employing a wide range of pedals, FX units and synth modules, the artist achieves his vision in a soothing, perfectly paced, yet radically intense musical form. Let us join him.
